NUTRITION SERVICES EDUCATION

The Board believes that all students and community members of the district should be provided up-to- date nutrition information that will enhance the educational environment. This belief is based on the premise that students learn best when participating in related learning experiences and offered choices with the necessary information provided to enable each individual to make safe healthy choices.

The nutrition services department shall provide nutrition information on menus, make nutrition handouts available to secondary students and provide food choices to students and community members that reflect dietary guidelines. The Dietary Guidelines for Americans are written by the U.S. Department of Health and Human Services and are available at each school kitchen.

To help meet the Oregon Educational Act for the 21st Century, the nutrition services department shall provide professional experiences for students in coordination with schools and departments that will enhance the student's ability to qualify for a job in a changing work environment. These experiences can include but are not limited to: quantity food production, catering, food specification and procurement, customer service, personnel management, staffing, inventorying and cost controls, sanitation training and food service computer software.
